UPC: 628383200239

Description détaillée :

The JV10H with HEPA certification vacuum cleaner will allow you finally to ally the strength and the flexibility. It is incredible to see that this small vacuum can pick up to 15 liters (4 gallons) of dry dust. How? By the intervention of its powerful motor with two levels. Equipped with a high-efficiency certified filter against the Air Particles (HEPA), corresponding to the standard renovation, repair, and paint(painting) (RRP) of the American agency for the environmental protection (EPA) for the upgrades of sites containing lead paints. Its suction with high lifting, its high capacity, and its robust construction makes the ideal tool for the professionals, the entrepreneurs, as well as for the industrial applications. Indeed, the JV10H a significant asset for your company.
