Description détaillée :

This commercial backpack vacuum model has not only all the equipment required for large jobs, but it is also easy to use as it is well suited for wearing it on the back. Offering a powerful suction despite a light weight of only 10.5 lbs, this backpack vacuum can be used in all places, especially those hard to reach. The harness is specifically designed to distribute the weight of the device between the back and the hips of the user and is equipped with an electric switch in which you can add a power nozzle. Moreover, when you think that the appliance is provided with a three-stage HEPA filtration and a 110 "water lift, we say that this device is a must for anyone who prides themselves on working in the sanitation business.
