## Description détaillée :

Built and designed in Canada, this **Johnny Vac central vacuum kit** is ideal for homes under 6,000 square feet and offers a quiet 68 dB operation thanks to its internal insulation.

Its hose is 35' (10 m) long. HEPA bags and a HEPA filter are included with this machine. It can be used with or without bags. The inverted tank makes it easy to replace the bag.

Thanks to its inverted suction, this central vacuum efficiently compacts the dust inside the bag. The vast choice of accessories will allow a simple and efficient cleaning of your home.
